The Ultimate Solution For Multi-Location Application

- For Mosquitoes, Cockroach & Houseflies management
- Quick knockdown result
- Odourless

Solfac[®] EW 050

ACTIVE INGREDIENT

Cyfluthrin 5% EW

RECOMMENDED USES

Solfac® 050 EW is ideally suited for the control of cockroaches, house flies and mosquitoes in houses and impregnating bed nets for the control of adult mosquitoes

MODE OF ACTION

Contact insecticide that affects sodium (Na⁺) balance inside the nerve cell of target insect.

BENEFITS

- Mixes easily and has little or no smell and very low irritancy, particularly suitable for sensitive applications
- Active ingredient has a good sticking property adhering the treated surfaces for a longer period of time
- Virtually invisible spray residues
- Inflammable and can be safely stored and transported
- WHOPES evaluated

DOSAGE

Purpose	Dose	Rate Method of Application
Residual Spray	8 ml/ lit of water	Spray 50 ml diluted solution/sq.mt.of the target surface ensuring coverage of pest hideouts like cracks, crevices and corners.
Bed net Impregnation	1 ml/ sq.mt. area of the bed net*	Dip the nets in diluted solution of Solfac EW, ensuring coverage of 50 mg of active ingredient per sq. mt. of bed net area. Later dry the net in shade and use it as per the conventional practice.

*Bed nets are available in different sizes. Calculate the area of four sides and the roof of individual bed net to get the total area in sq. mt. Then prepare the solution according to the above guideline.

ANTIDOTE

If swallowed, gastric lavage with warm water may be given, followed by administration of mixture containing 2 parts of activated charcoal, 1 part of magnesium oxide and 1 part of tannic acid in a glass of warm water. Treat symptomatically

PACKS

1 lit, 100 ml

Insecticide
for management of mosquitoes,
house flies and cockroaches
