

Fuel Calculator

Application

- Highly reliable and accurate fuel consumption measurement in trucks, Tankers, Infrastructure and Construction machinery, agriculture machinery, river boats and diesel engine.
- It define you an accurate consumption of fuel so difficult to theft fuel from vehicle

Features & technical data

In their facility to enter : fuel filling qty, and its add in total filling automatic when you press enter key,

- 1) Indicate total fuel consumption, Indicate total fuel supply toward engine, Indicate total fuel return from engine.
- 2) Indicate total time of fuel supply, Indicate total time of Fuel return, Indicate total time of Fuel consumption.
- 3) Indicate fuel consumption, supply fuel and return fuel flow rate : litter/hour.

4) Total filling, Total consume, and balance fuel in tank
above all 4 display change with shift key, 8 digit , 4 line lcd display
Suitable with all fuel flow sensor

On board power supply from Vehicle-8 - 30 VDC

Flow sensor exciting power 12vdc from panel

Output : RS-232/RS-485 MODBUS

Option:

- 1) Fuel consumption meter available with digital output pulse at specified fuel consumption for connect to GPRS or GPS system
