PULVRIZER

The laboratory pulverizer is a disc type grinder, Designed to grind virtually any material to produce a fine mesh sample in one operation. The instrument is useful for assaying, mining and for metallurgical, quarrying, aggregate processing, chemical, geological and industrial laboratories. It is a self contained grinder, with a rotary disc, having a planetary movement in a vertical plane. This feature gives added life to the moving parts and produces a sample of uniform fineness.

Laboratory Pulverizer:

Disc Diameter	175 mm.
Maximam Feed Size	10 to 15 mm
Capacity	6 to 10 kg per hours
Finished Size	100 mesh
