TWO-WHEELER BATTERIES (VRLA BATTERY)

Technical Features

Volatic Batteries advance AGM technology is developed to achieve the precocious requirements of automotive industry with its outstanding battery life and reliable performance. Volatic Batteries AGM batteries complies various quality and international safety standards. Volatic Batteries is the battery company that makes all parts and components of VRLA batteries by itself.

- For vehicles with advanced start-stop function and regenerative braking.
- Durable, lasting up to 3x longer cycle life than standard flooded batteries when used in start-stop vehicles.
- Reliable, delivering superior electrical performance for high electrical demand.
- Delivers better starting power in cold weather.
- Safe, certified non-spillable. Suitable for mounting in any orientation.
- Improved durability in hot climates with heat-deflection container design.
- AGM Batteries with confidence for that extra boost in harsh climates and demanding conditions and for advanced start-stop systems.
- High Integrity and Long design life
- Maintenance-free Batteries
- Spill proof and leak proof
- No corrosive fumes
- Customized solution for different application
- Easily cell replacement capability
- 100% pre-delivery inspection to ensure stable quality and reliable performance.
- Pb-Ca alloy battery plate grid, low water loss and low self-discharge rate.
- Introducing Volatic Prime- The only zero maintenance VRLA motorcycle battery with the 50 Months Warranty period.
