Giving Shape to Ideas

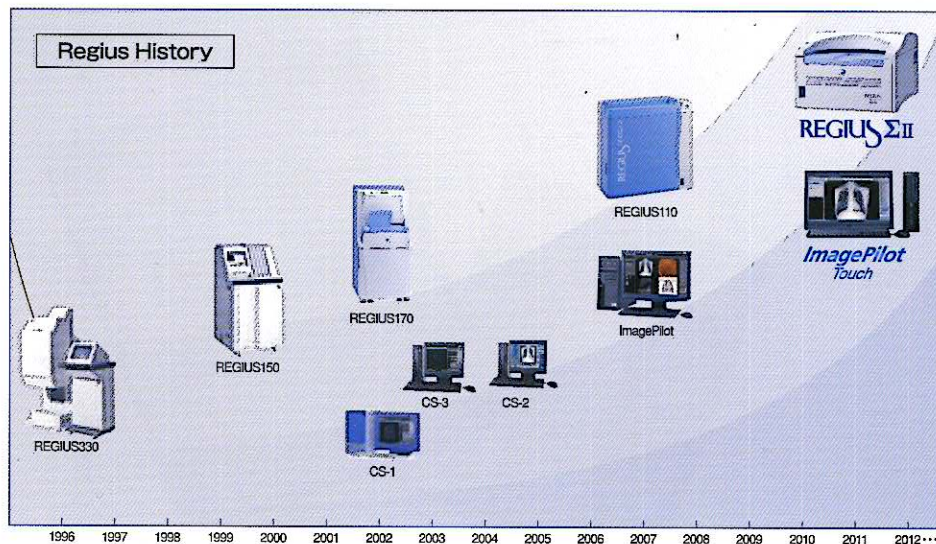

KONICA MINOLTA

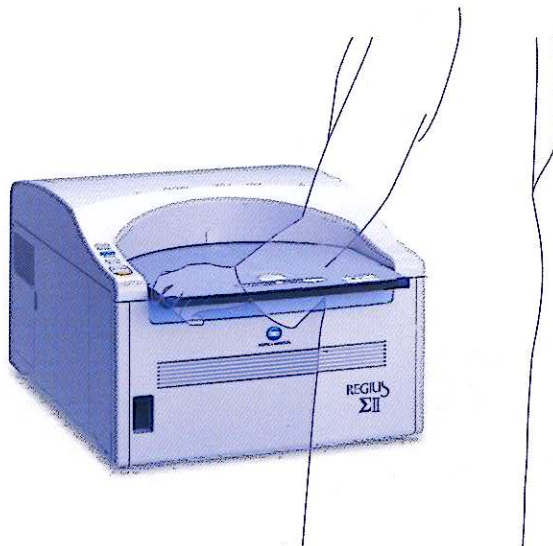

Konica Minolta has been a CR technology leader since 1996 - consistently designing, developing, and delivering innovative solutions. The REGIUS Σ II represents the sum of this experience. REGIUS Σ II delivers a compact and affordable imaging solution that maintains the superior image quality and reliability expected from our REGIUS family of products. Combined with the redesigned ImagePilot software, the REGIUS Σ II provides simple operation and smooth workflow to a wide range of medical practitioners.

High Throughput of 60plates/hour (maximum)

REGIUS Σ II

From patient registration to long term archive,

I. Register

Manual or automated patient registration from anywhere in the office. Select the patient from the worklist or input patient information. No need to specify body part or exam type.

II. Digitize

Just insert an exposed cassette into the REGIUS Σ II CR reader. The ImagePilot then automatically processes the image for optimized diagnostic viewing.

ImagePilot

■ Quick Preview

The fully automated image processing produces consistent optimized images that display within 45 seconds.

■ Print composition

ImagePilot supports a print composer mode. Use this mode from any client station to print multiple images on one sheet of film or paper.

▲ Print Composer

■ Easy recovery

If the plate jam occurs, it can be removed easily by opening the top cover or the backside cover.

■ Multifunctional Viewing

ImagePilot supports over 100 features and functions.

- Annotation
Line/Arrow/Rectangle/Text/Shutter/Marker, etc
- Scaling
Cardio Index/Distance/Angle/Rectangular CT/Pelvis Analysis, etc
- Image Tool
Window Level/Zoom/Pan Magnifier/REGIUS Processing, etc
- Report
- Other Modality Image

■ Web Viewing

At your home and trip destination, you can see the images of image Pilot via VPN.

Konica Minolta provides complete workflow

III. View

Images can be viewed at up to 20 ImagePilot client workstations throughout the office. Each client supports all the same ImagePilot functions - the same GUI at every seat.

IV. Print

The DRYPRO SIGMA outputs the films up to 45 sheets (14x7") per after the image has been printed from ImagePilot. DRPRO SIGMA has four types of films available, which can be transposed based on user needs.

Drypro Sigma

Compact Design

DRYPRO SIGMA is a desktop DRY Laser Imager. It features a compact footprint as small as 65x60cm. It is designed to seamlessly integrate into various environments when combined with REGIUS II.

Four film sizes and easy loading process

Users can use four types of films for different purposes. Open the front cover, retrieve the film inside, and load new one. Replacing the film can be done with this simple process

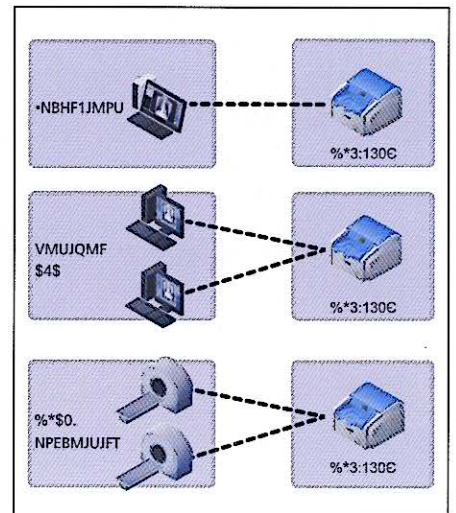

User - Friendly

DRYPRO SIGMA is easy to operate, requiring no hands - on training upon installation and offering intuitive usability.

DICOM Printer

DRYPRO SIGMA can connect easily to other CR and DR consoles. CT, and MR, in addition to ImagePilot. Non-DICOM images can be scanned easily using imagePilot. Non-DICOM images can be scanned easily using ImagedPilot and can also be printed using DRYPRO SIGMA.

COMPACT

REGIUS Σ II

■Konica Minolta's Ultra-Compact CR

The REGIUS Σ II is Konica Minolta's smallest and lightest CR. The desktop CR has a footprint of only 0.31m² and weighs a mere 28kg.

& 28kg

■Environmentally Friendly

The REGIUS Σ II was designed with the environment in mind. Energy consumption has been reduced to 100VA - about the same as a household light bulb. That's one tenth the power of the smallest film processor.

HIGH QUALITY

■High Resolution

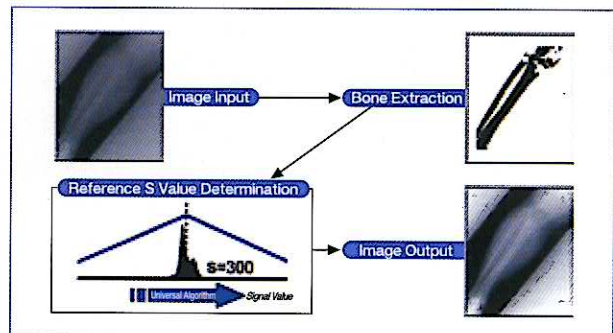

The REGIUS Σ II supports pixel sizes of 87.5 μ m and 175 μ m for all cassette sizes, achieving a maximum resolution of 4020x4892 pixels (14x17 at 87.5 μ m).

■Integral Processing

Integral Processing - the result of Konica Minolta's vast imaging experience - is a robust algorithm that produces the optimum diagnostic image automatically. This patented technique greatly simplifies x-ray image acquisition while delivering incredibly consistent image quality and virtually eliminating retakes.

SMART CONSOLE

ImagePilot

■All-in-One!

The ImagePilot software combines CR image acquisition and PACS functionality. It is a complete workflow solution for clinics, imaging centers, and small hospitals. From one GUI, users can acquire, review, distribute, and archive patient images.

■Easy Control

ImagePilot supports a multi-touch display for the easiest operation. The more than 100 functions and features are literally at the tips of your fingers.
