

## Plastic Disc Valves

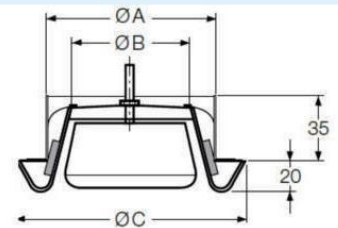

### ***TDV Series – Simple Yet So Effective***

Disc valves are made of recyclable Polypropen material which is heat resistant up to 100 °C. It is designed for mounting in ceiling/walls of restrooms, kitchens etc.. They are highly effective in controlling supply and exhaust air for domestic, commercial and industrial ventilation applications.

**AERODYNAMIC DESIGN | LOW SOUND LEVEL | LARGE CAPACITY | QUICK & EASY INSTALLATION**

### ***Dimensions And Weight***

| Product code | Dimension |     |     |    | Weight (Kgs) |
|--------------|-----------|-----|-----|----|--------------|
|              | A         | B   | C   | D  |              |
| TDV 80       | 80        | 45  | 120 | 55 | 0.09         |
| TDV 100      | 100       | 70  | 145 | 55 | 0.12         |
| TDV 125      | 125       | 95  | 160 | 55 | 0.15         |
| TDV 160      | 160       | 115 | 195 | 55 | 0.2          |
| TDV 200      | 200       | 172 | 240 | 55 | 0.34         |

## Refnet (Copper Joints)

### **Y JOINT**

### **U JOINT**

### **L JOINT**

We are manufacturers and suppliers of VRV Refnet joints and the range offered by us can fulfil the requirement of all the OEM's. They are manufactured with latest water jet technology without any brazing spots. The insulation is made with best quality material and can be customized as per the requirements of an OEM.

**Transmonk Ensures Best Quality Along With Guaranteed No Leakage Of The Refrigerant**
