

Product Name	Walk-Through Metal Detector (Auto Safegate - III)	Walk-Through Metal Detector(Auto Safegate - II)
Model No.	CINT/ Auto Safegate	CINT/ Auto Safegate
Description	<ul style="list-style-type: none"> • With Traffic Counter • Low cost walkthrough detector for weapon detection • Quick installation - no training required • Automatic zero adjustment • Ignores metals outside the frame • 10 levels of sensitivity and 2 levels of alarm • 10 step bar-graph indicator • 3 level LED indicator for low, medium and high levels of alarm • Piezoelectric beeper for indication of metal • WALK and STOP indicators to regulate traffic • Detects all metals, alloys and ferrites • Low field strength- no effect on pacemakers and magnetic media • SMPS power supply - works from 90V to 270V with full-function battery backup 	<ul style="list-style-type: none"> • Without Traffic Counter • Low cost walkthrough detector for weapon detection • Quick installation - no training required • Automatic zero adjustment • Ignores metals outside the frame • 10 levels of sensitivity and 2 levels of alarm • 10 step bar-graph indicator • 3 level LED indicator for low, medium and high levels of alarm • Piezoelectric beeper for indication of metal • WALK and STOP indicators to regulate traffic • Detects all metals, alloys and ferrites • Low field strength- no effect on pacemakers and magnetic media • SMPS power supply - works from 90V to 270V with full-function battery backup
