INTRODUCING

Differently-abled person's toilet alarm system

Having a differently-abled persons' toilet alarm system installed in your residential or commercial property is significantly essential if a mobility-impaired or differently-abled person's will be using your toilet or bathroom. A differently-abled toilet alarm is a simple yet extremely useful system that can be facilely installed in all sorts of bathrooms and helps to alert and notify fellow building dwellers if any differently-abled person's is in trouble or distress while using the toilet or bathroom. These alarms are triggered and activated by pulling on a cord. This differently-abled person's toilet alarm system also ensures the safety of a differently-abled person's while on the property and enables more independence and privacy while using the bathroom.

Let us walk you through the differently-abled toilet alarm features

- Simple 2 wire operation for all field devices
- Control Panel supporting up to 4 zones
- Simple maintenance
- On-board buzzer in both Control Panel
- Zone LED indication on Control Panel
- Full range of field devices available (i.e. Pull Cord, Cancel, Reset & Remote Indicator)
- Control Panel with potential free alarm output for BMS integration.
- Differently abled WC sticker

Ideally suited for

Health Centers	Sheltered Housing	Public Buildings
Commercial Buildings	Care Homes	Assisted Living Establishments
Shops	Schools	Granny Flats
Sports Facilities	Cinema	

This differently-abled persons' toilet alarm system is available as a single zone kit that can be expanded up to 4 zones (where one zone is usually used for each toilet). It has been designed for use in differently-abled persons' abodes to meet the requirements of BS8300.
