HIMALAYAN PINK ROCK SALT
FREE FLOW TABLE SALT

NATURALLY RICH WITH MINERALS & DETOXIFIERS

FRONT SIDE

Pink Himalayan salt is a pink-colored salt extracted from the Khewra Salt Mine, which is located near the Himalayas. The Khewra Salt Mine is one of the largest salt mine in the world. The pink Himalayan salt harvested from this mine is believed to have been formed millions of years ago from the evaporation of ancient bodies of water. The salt is hand-extracted and minimally processed to yield an unrefined product that's free of additives and thought to be much more natural than table salt.

Like table salt, pink Himalayan salt is mostly comprised of sodium chloride.

However, the natural harvesting process allows pink Himalayan salt to possess many other minerals and trace elements that are not found in regular table salt.
