**INTELLIGENT
JET PRINTER**
5 INCH LARGE TOUCH SCREEN

NOTE:

T-D is one inch ink cartridge * 2 (48.0mm)

T-X is one inch ink cartridge * 1 (12.7mm)

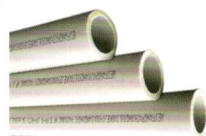

T-Y is one inch ink cartridge * 1 (25.4mm)

Touch Series

As an industry leader, we spare no effort to develop new products and research new technologies. After two years of development, the company has launched a new touch series of intelligent touch screen digital inkjet printers based on a large amount of capital and manpower. (Hereinafter referred to as T series). Nowadays, T-X, T-Y and T-D are all available. It adopts the most advanced thermal bubble spray technology and uses the 5-inch high-definition color touch display for the first time. The ARM-11 embedded operating system can be switched between Chinese and English. Achieve the advantages of low cost, high efficiency, dedicated, safe, and stable operation.

Touch series intelligent touch screen digital inkjet printer can realize two working modes: handheld and online. Handheld working mode is convenient and easy to use, and is not subject to site restrictions: The online working mode is equipped with a conveyor table and a printer stand to achieve mass production of packing line, improve work efficiency, and save manpower and material costs.

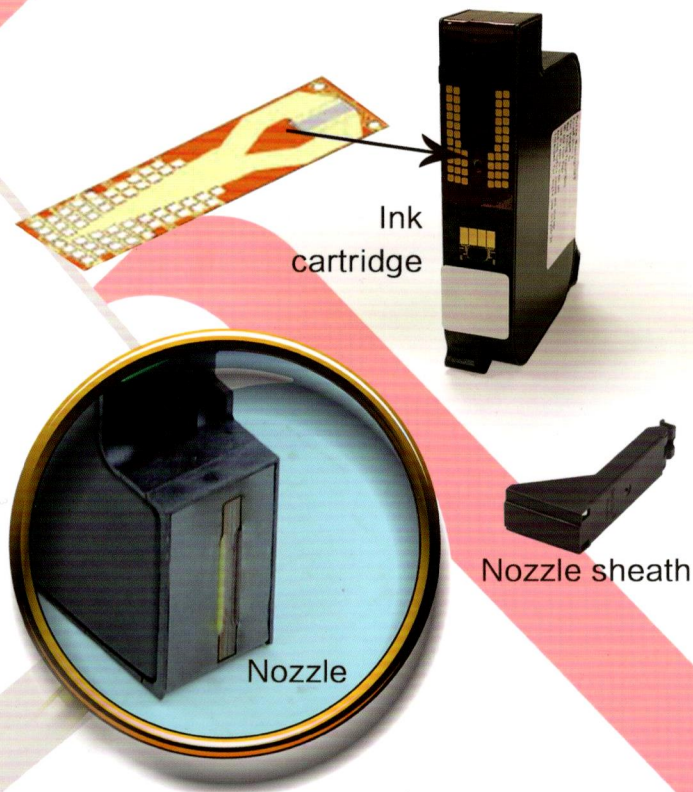

The T-D printing precision can up to 300DPI, and the printing height can up to 48mm. The dual-purpose mode is widely used in food, beverage, medicine, cosmetics, packaging, sheet stone and other industries.

What we do

The new touch series inkjet uses half inch and 1 inch nozzles (T-X is half inch nozzle), and the nozzle height of ink cartridge is 12.7mm and 25.4mm respectively (T-D uses two 1 inch ink cartridges), and is in the leading position in the industry. The ink used in the nozzle is carefully tested for chemical properties such as primary color, viscosity, surface tension, pH, particle volume, electrical conductivity and absorbency to ensure proper operation of the printer.

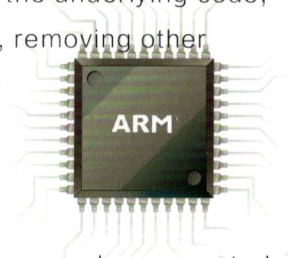

Our company is officially authorized by iut, and each nozzle is inspected before leaving the factory to ensure the quality. Relying on iut's powerful technical support, our ink cartridges have below advantage: no block the nozzle, fast drying, no blooming, corrosion resistance, clear image, natural, high blackness, etc.

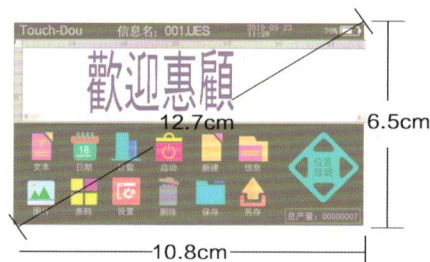

ARM-11 embedded operating system

Touch series intelligent touch screen digital inkjet printer uses the latest developed ARM-11 embedded operating system to optimize the underlying code, retaining only the functions closely related to the application, removing other redundant functions, with the lowest power consumption and resources, implement the requirements of the application. At the same time, which is to guarantee the system can operate more stably and efficiently.

At the same time support RS232 serial port and I/O interface, can be connected to the keyboard, mouse and U disk, more convenient operation requires editing information.

Big touch screen

Touch series intelligent touch screen digital inkjet printer use 5-inch large color touch display and is the first to use 5-inch on the ink jet printer market. The screen is more sensitive and the display range is larger. With a touch pen, you can click on the screen accurately and to minimize operational errors. At the same time, the font is clearer and more recognizable.

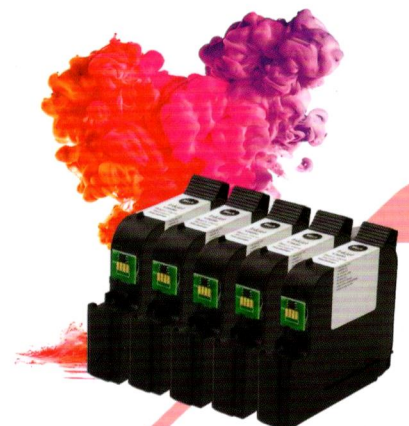

High speed USB interface

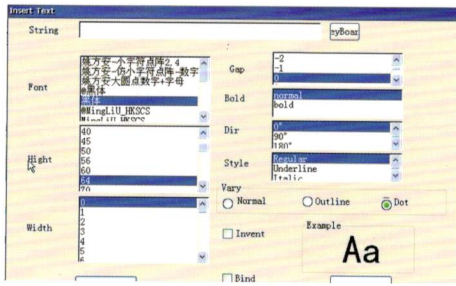

Touch series intelligent touch screen digital inkjet printer adds a high-speed USB interface to the body. The user can connect the keyboard and mouse as needed to achieve more efficient printing, adding, deleting and editing. You can print the trademark LOGO, DIY pictures, or as your requirement. to make the printing is more humanized.

Multiple types & colourful ink cartridges

Touch series intelligent touch screen digital inkjet printer can use various dry and water-based inks to print various materials according to customer needs. We will also be equipped with different color inks to meet the needs of customers to print different colors.

Variety of fonts

Touch series intelligent touch screen digital inkjet printer uses the variety font style of T1 and synchronizes computer special fonts. At the same time, you can download the fonts and install them according to customers requirements. As we know, dot matrix font is widely used for printing, and this machine can print dot matrix font perfectly.

Imported batteries core long standby

Touch series intelligent touch screen digital inkjet printer adopts imported battery core, battery storage capacity is stronger, battery is more durable, and it can be used for up to 10 hours when fully charged. Long standby is not a problem. It can easily meet the printing needs and bid farewell to frequent charging troubles.

handheld

online

Hand held and online working methods

Touch series intelligent touch screen digital inkjet printer has two working modes: hand held and online. Hand-held ink jet printer: lightweight and easy to carry, mobile work, suitable for small quantity big products.

Variable data printing

After continuous experimentation, T-X and T-Y smart touch screen printer has been improved and upgraded on the basis of the original. Breaking the limitation that T1 can only print fixed data, and making the printing of variable data become a reality through remote connection with the PC. The application of variable data such as variable two-dimensional code can trace the source to prevent anti-counterfeiting and non-replication, and better control product quality.

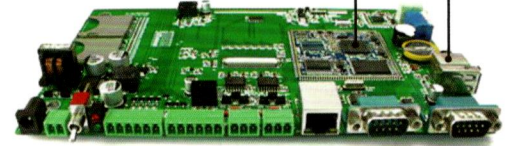

It can store 190 million characters and support reading external U disk data..

Built-in big-capacity high-quality storage SD card

Built-in SD card permanent storage of information

Touch series intelligent touch screen digital inkjet printer uses imported SD storage media to be implanted inside the machine. Store 190,000,000 characters or 60,000 printable images and save the information permanently. Convenient for customers to copy information.

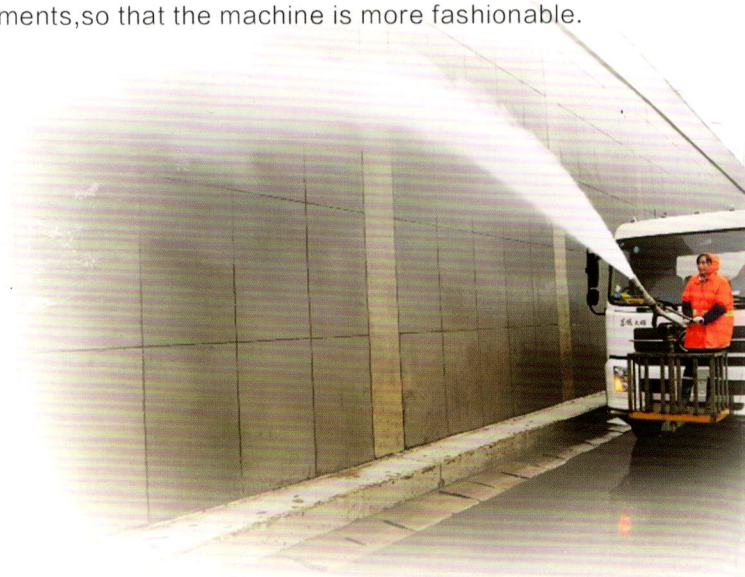

Multiple colors optional

Touch series intelligent touch screen digital inkjet printer is equipped with a variety of colors, customers can choose the colour according to their requirements, so that the machine is more fashionable.

Self-cleaning function

Touch series intelligent touch screen digital inkjet printer comes with self-cleaning function. It can well avoid the problem of jamming the printer. Make the printer more durable and last longer.

Multi-language version

Touch series intelligent touch screen digital inkjet printer, in order to meet the needs of foreign trade customers and better expand the foreign market, our company has upgraded and expanded the system language on the basis of the original, and has completed English, Korean, Spanish and Russian version. Other languages are also accumulating extremely developed.

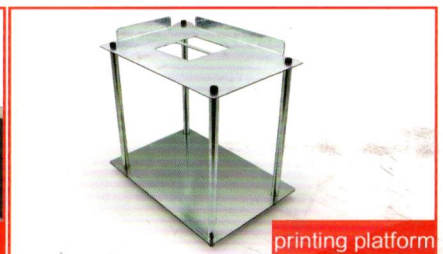

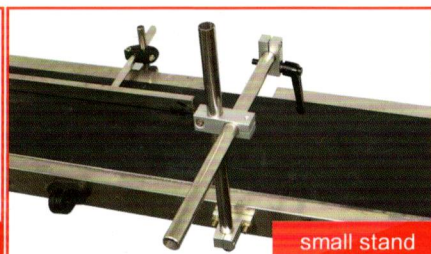

OEM OR ODM service

Our company specializes in inkjet marking for more than ten years, specializing in the production of inkjet printers, which can provide personalization and transformation services for inkjet printers, including boot page, company head-up, LOGO and other personalized customization, as well as individualized adaptation to meet production needs. We aim to provide you with a more comprehensive and more personalized marking service.

Product technical parameter list

Machine size: L140*D53*H235MM (T-X/T-Y)、L140*D80*H235MM (T-D) (including handle)	
Weight: about 800 grams (without ink box)	Stored information: unlimited storage
Segmenting function: 5 segment	Precision of printing: 300DPI
Screen size: 5 inch touch screen (10.8*6.5cm)	Count sequence number: 1-8 digits
Count sequence number: 1-8 digits	Bar code: bar code and variable two-dimensional code
Environment: temperature 0-40 °C, humidity 10-80%	Ink properties: dry and Oiliness
External interface: charging interface, RS232 serial port, USB transmission interface	
Fast drying color: black/white/red/yellow/blue/green	Oiliness color: black/white/red/yellow/blue/green
Cartridge capacity: 42CC(T-X)、45CC(T-Y)	Printer: complete synchronous machine
Spray printing distance: 2-5mm	Jet printing height: 1/2 inch(T-X), 1 inch(T-Y), 2 inch(T-D)
Speed of printing: 60 m / min	Power parameter: DC14.8V lithium battery
Automatic inkjet printing: date, count, batch number, serial number, etc.	
Because of product upgrading, all of the above mentioned product specification, colour, design, function, if changed in the future, please contact our sales staff on time.
