Precision Control**

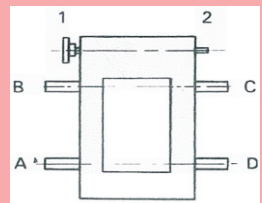

PIV PRECISION CONTROL

With Precision Control Numerical Handwheel and the pre-loading of PIV unit is added feature for application where precision and synchronization are important.

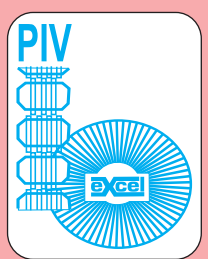

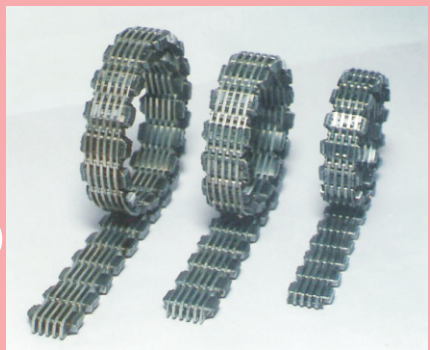

These devices have been developed for fitting to the PIV Variators, the prime object being greater sensitivity of control over the complete speed range.

To enable these devices to be assembled correctly on the PIV unit **it is essential to state, while ordering,** the position of the **constant** (input) shaft..... at (A/D) or (B/C), as also the position of the Numerical Control Handwheel at (1) or (2) in the diagram shown here

- We supply new PIV units as per your required mounting dimensions
- Excel PIV units available in all sizes / ranges
- We repair / overhaul your existing PIV units
- We supply genuine spare parts (*Indigenous/Imported*)
- We undertake annual maintenance / service contract (*any where in India*)
