

# Mass Industrial Solutions

## Industrial Weighing and Material Handling

---

*Solution provider for complete range of industrial electronic weighing and material handling equipment & systems, including, design, sales and service with state of the art electronics from reputed multinationals from all over the globe.*

# Our Profile

- Partners in USA, New Zealand, Australia, Korea and China
- Associates at Andhra Pradesh, Odisha and Maharashtra
- Catering to the weighing and automation needs of industries like Steel, Cement, Fertilizer, Food, Sugar, Mining and Aggregate
- Cost effective weighing solutions with state of the art, plug and forget type electronics and accessories and indigenous structural elements and assembly

# MASS - Static Rail Weighing

## Key Features

- Structure less Static Rail weighing for Rail wagon Workshops, Coke Oven Charging car, Hot-metal ladle car weighing.
- Load cells as Rail and not strain gauges mounted on Rails.
- Easy to install & maintain.
- Capacities upto 150t.
- Touch screen Display Indicator or standard Indicators .
- Complete range of High Capacity Load cells for Steel Plant applications & High temperature Load cells upto 250° C, Weighing applications.

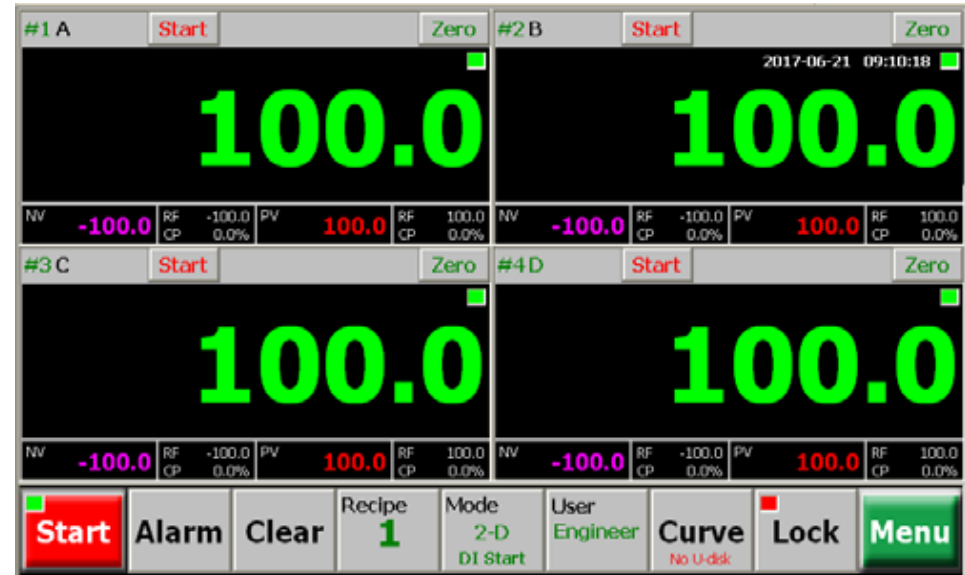

Coke Oven Charging Car Weighing System at JSW Thornagallu

## Standard Controller with PLC Integration options

Standard & tailor made features to suit Site requirements

## Touch Screen Controller with Single draft weighing or Each Wheel weighing options

- Feature filled Controllers
- Wide options to choose from
- High Temperature Application Load Cells for Steel plant applications
