

# HOT WATER CIRCULATION PANEL

## Introduction

M/s. AVENTEK was started in the year 1994 for manufacturing microprocessor based process control instruments. The company has developed many micro controller based innovative products for automation and has created a very good OEM base. The new ideas from OEMs and their implementations with in house technology has given an edge to our OEMs over their competitors. This has resulted in repetitive orders with continuous new development projects.

Hot water system panels are Highly accurate reliable & user friendly for operation. Also The panel can be Monitor and Operated by Temperature and Real timer clock . this can be given as Optional as according through User Requirement. In panel manual over ride option also given for if not required Real time base operation put in manual mode and temperature base it works ,due to this hot water supply will any time provided to residential societies, hospitals, restaurants, industries etc.

## Segments and Applications

- Residential/ Commercial/ Industrial Buildings
- Airports
- Hotels
- Municipal Corporation
- Automotive
- Textiles
- Steel/ Cement/ Process/ Pharma Industries
- Power
- IT Parks
- Hospitals
- Sugar Industries
- Multiplexes

# HOT WATER CIRCULATION PANEL

## Specification

<b>Operation Mode :</b>	Auto / Manual (As per required )
<b>Auto Operation:</b>	Operated on applicable Temperature sensors and Real Time Clock .
<b>Automatic Control:</b>	Time and Temperature base
<b>Indications:</b>	Electrical Parameters like Voltage , Temperature on Display screen.
<b>Switchgear:</b>	Contactors or Relay as per pumps selection.
<b>Enclosures:</b>	ABS Enclosure or Metal enclosure.
<b>Input :</b>	230VAC
<b>Output :</b>	230VAC / 415VAC

## APPRECIATION:-

## Aventek
