

The ancient Hindu way of life, based on the Karma theory, looked at the progress of the human soul based on three essential macroscopic parameters. They are: The Karma acquired from your past life, the karma you acquire by virtue of your actions in your present life and based on these your future life.

They classified our present life into four broad aspects. Dharma or right living, Artha or the monetary aspect, Kama or the desires and finally Moksha or spiritual progress and liberation. They recognized the importance of balancing these four aspects of life for the proper progress. To understand and improve all these four aspects they gave us various

Shastras. The Veda shastras for spiritual progress, the Dharma and Nyaya shastras for the legal and social conduct, the Artha (finance), Ganita (mathematics), Vanijya (trade) shastras for earning money, Sangeeta (music) Nritya (dance) Shilpa (art) Kama (sex) Paka (cooking) shastras for pleasure. Finally the Jyotishya (Jyoti=light+ Isha=God meaning the light of God to remove ignorance) was given to us as a guide, to get the best results during the most suitable times, in each of the above four areas of life. The entire basis and theology of our astrology is based on these principles.

Vedic astrology is the most complete and comprehensive system. Planets are constantly in motion with respect to earth in the skies. The positions of Sun, moon and some other planets are close with earth, so they have effected to every people, trees, Animals, Birds Rivers, Sea etc and any type of living things.

So we can forecast about his/her health, and wealth and others expectation by study of the movement of planets in sky. We can prove that the planets must effected in earth. You may study in the night of purnima and also amavasya, the water of Sea up and down forcibly called Jvarbhata, it is controlled by moon, because according the astrology moon is the karak of water.

The modern scientists do not accept astrology. But it is a known fact that planets do have their effects on us. The doctors of almost all mental asylums accept the fact that during the full moon and the new Moon periods the mental patients behave erratically. The police record the same effects on many criminals.

The modern scientists know some of the effects of the ultraviolet rays, gamma rays and beta rays of the planets. But unfortunately they don't have the divine wisdom of our ancient is to know all the effects fully.

Indian astrology is based on the theory of fate. The good and the bad actions of the past life determine your fate or Karma of your present life, and the actions of your present life determine your future Karma. According to Indian astrology a person is born at that place, on that day and on that moment when his individual fate is in perfect mathematical harmony with the progress of the stars in heaven. However it does not preach total dependence on fate. Astrology lets you know what you were born with, what your possibilities are, the limitations, your strong points and your drawbacks.

What type of life partners and professions suit you and to expect is also indicated. It also prescribes various remedial measures to ward off the bad effects and to enhance the good results. Astrology is your roadmap of destiny. However your fate is in your hands. The scriptures guide us by telling us what is good and what is bad; what to do and what not to do; how to do and how not to do.
