

Palmistry is our ancient science for know the destiny future and present by reading the palm ,

Palmistry has been practised for several thousand years, each area of the palm of the hand and the fingers can be "read" to give clues about a person's life and future and personality. Other theories suggest that the left hand shows the past, and the right hand the future, or that the significance is gender - read the right hand for a man, the left for a woman. In our hands, the mounts and ridges, the nails, and position of the digits-- each element reveals something new about our personalities; left and right hands cover different aspects of our lives.

We have some major and some minor lines in our hand, these major lines in our hand which are life line (which encircles the thumb), the head line (which starts at or near the life line between the thumb and index finger) this presents the person's vitality and vigor, physical health and general well being. The life line is also believed to reflect major life changes, including cataclysmic events, physical injuries, and relocations.

This also shows the age of the person. Heart line (which starts at below the little finger and usually curves upward toward the index finger). We can predict matters of the heart, both physical and metaphorical, and believe it can indicate emotional stability, romantic perspectives, depression, and stoicism, in addition to various aspects of cardiac health.

Mind line- it starts from the middle between index and thumb, and also joins with life line some time not, generally interpret this line to represent the person's mind and the way it works, including learning style, communication style, Education and also indicate any injury on the head. Fate line- it is a vertical line in the center of palm start from wrist joint and till the center finger (long finger). Health line- health line starts from the lower area of palm and goes to the root of little finger.

Marriage line- this is a small horizontal line which can be found at below of little finger.

Sun Line- sun line starts from the last of palm or may be center of palm and last till to ring finger.

9 planets are also found in our palm all are highly effected our life and also give his effect to other lines.

1. Jupiter- last joint of index finger

Saturn-below the middle finger

Sun- Below the ring finger

Mercury- below the little finger

Mars- below of little finger and center of palm this is first mars.

Moon- just below at the mount of 2nd mars

Venus- below the thumb

Rahu- last and center of palm where the fate line start.

Ketu below of Rahu.

Trevel line- trevel lines can found on the wrist, or on the mount of moon these are horizontal lines,. Each line is said to represent a trip taken by the subject, the longest line make the trevel long trip and also useful

You can predict your destiny by sending your colour photographs of both hand to us, our palmistry expert predict you, or call us.
