

## Double Cone Mixers (removable container type) DCM-Series

### Basic features of DCM - series

- Very Easy Handling of machine as well as products to be blended in it
- Dust Free Working possible because of Unique design
- Very easy, fast & guaranteed cleaning possible due to easy access to complete area of containers
- Reduces time of Operations – time for loading, unloading by using spare removable container
- Perfect Weight loading is possible due to movable container for specific / critical products.
- Adjustable blending time
- Wide range of capacity from 25 ltrs to 500 ltrs. Volume
- Robust Design for smooth running
- Wide Area of application – Dry Powders / wet products
- Available in Std. & GMP models

DCM-200 in assembly stage

Removable container fitting by eye bolts / Toggle clamps

Container Removing by Mechanical / Hydraulic Jack

## Technical Specifications (DCM-Series)

Specifications					
Model	DCM-25	DCM-50	DCM-100	DCM-200	DCM-500
Total Volume of DCM (Ltrs)	25.0	50.0	100.0	200.0	500.0
Loading Capacity of single container (Ltrs)	12.0	25.0	60.0	125.0	300.0
Blending Time Range ( Mints.)	1-3	1-3	2-6	2-6	2-6
Blending Speed	30	30	25	25	20
Motor Power (hp)	1.0	2.0	3.0	5.0	12.5

*Special pupose blenders can be made as per customers requirements on specific request.*

*These blenders can be provided with on line side feeding of lequide products for special applications.*
