Further, we can deal with the demand for it in time-efficient manner.

Information :

- High Swelling and Gelling
- Greater Moulding Strength
- High Compactibility

Other Information

- Minimum Order Quantity : 21 M.T

3. Drilling Grade Bentonite

Bentonite is as a mud constituent for oil- and water- well drilling. Its role is mainly to seal the borehole walls, to remove drill cuttings and to lubricate the cutting head. The special higher mud yield results in using less quantity of Bentonite for the same standard mud. This results in lesser requirement of Bentonite.

- Retains thixotropic properties when met with brine and high temperature in deep drilling
- Gives high barrel yield

Withstands formation pressure

We offers following grade of Bentonite –

- API 13A Section – 4 Grade Bentonite Powder:
- API 13A Section – 6 (OCMA) Grade Bentonite Powder:
- OCMA DFCP – 4 Grade Bentonite Powder:
