

## DOLOMITE

Dolomite Powder offered by us is highly appreciated for its whiteness and purity. This white dolomite powder has found applications in rubber industry, paint, ceramic and power coating industry, detergent and flooring applications. The chief properties that make dolomite powder widely demanded by our honored customers are its less reactivity and good acid resistance. Apart from this, we assure our customers of the delivery of dolomite powder within stipulated time frame and in customized quantities. We are tagged as one of the leading White Dolomite Powder Manufacturers and Exporters from India

### Typical Properties of Dolomite :

- Less reactive
- Better acid resistance
- Increases flow rates because of its higher Bulk Density and Sp. Gravity
- Higher Production rate

### Application of Dolomite :

- Rigid PVC pipes
- An additive for Thermoplastic and as a hardning agent for Rubber industry

# SHASHI MINERALS

Jodhpur India

do/01/2016

- Power Coating, Paints and Ceramic industry
- Reinforced Polyester glass fibre
- Leather cloth and Flooring applications
- Detergent applications
- Glass Industry (In manufacturing Sheet & Optical Glasses)

Our grades of Dolomite powder are available in 300 Mesh to 700 Mesh BSS standard and in Micronise grades Our grades are available in top cut 5, 10, 15 & 20 Microns with Brightness ranging from 85% to 95% and with Mgo contents ranging from 19% to 22%.

Chemical Composition of Dolomite :

- CaCO<sub>3</sub> : 51 to 56%
- MgCO<sub>3</sub> : 42 to 45%
- Mix Oxides : 1 to 3%
- SiO<sub>2</sub> : 0.5 to 2.5%
- LOI : 41 to 44%

Variation of the specifications stated due to natural raw materials and environment conditions are possible though they have no influence on the application properties described.
