PAINTCO NC SANDING SEALER   10517

DESCRIPTION

- Paintco NC Sanding Sealer is a rapid drying product based on nitrocellulose. It fills pores of wood surface and facilities sanding. The sanded product is smooth, nonporous and ready for subsequent painting.

PHYSICAL DATA

Pigment	:	Stearates	
Appearance	:	Hazy	
Specific gravity	:	Approx. 0.96	
Solids content %	:	Approx. 32 %	
Finish	:	Matt	
Drying time at 30oC	:	Dust dry	: 10 minutes
		Dry for sanding	: 30 minutes
Flash point	:	20oC	

APPLICATION DATA

- Paintco NC Sanding Sealer should be reduced to 20-25 sec. using Lacquer Thinner on Ford Cup B4 at 30oC before application. Recommended application method is by air spray. Several coats of Paintco NC Sanding Sealer are recommended in order to get smooth and non-absorbent surface and thereby reducing the number of coats of clear lacquer.

REMARKS

- We recommended that Paintco NC Sanding sealer should be applied on substrates in a well ventilated room. The product is   flammable and all   care must be taken during storage and use.
